

ECOFIT Networked Cardio brings the power of connected fitness to your facility

**Increased value
for members**

Members scan and track their workouts on your cardio equipment using their favorite fitness apps. One click does it.

**Increased value
for facility owners**

Owners get real-time data on equipment usage, analytics, demographic stats, and enhanced asset management.

Ask how **ECOFIT** can work with your vendors to network your fitness equipment!

provides real-time data and fitness tracking with your members' favorite fitness apps

The benefits

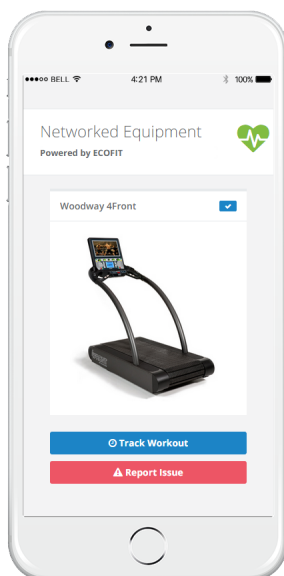

- Most **economical** cardio networking solution
- **Compatible** with major fitness brands
- **Retrofit** existing cardio equipment
- Indoor cardio fitness tracking using your members' **favorite apps**, as simple as scanning a QR code
- Works with industry solutions such as **Netpulse** and **Under Armour Connected Fitness**
- Works with **industry-standard** asset management software
- Proprietary, high efficiency, non-WIFI **wireless** protocol
