

Automated asset management for your fitness facilities

Cross brand

Compatible with major fitness brands. Partnerships in place to provide advanced data sets i.e. error codes.

Largest ROI opportunities

- floor optimizations
- service efficiencies
- procurement savings
- extended equipment life

Comprehensive

- network all fitness machines
- selectorized
- plate loaded
- cardio equipment

Enterprise equipment management

Ecofit provides an industry standard networking solution. It is widely adopted by the commercial fitness industry.

- automated data collection
- data driven decision enhancement
- real time notification

How it works

INSTALL sensor technology onto your fitness equipment that tracks equipment usage through a wireless network.

COLLECT and analyze equipment usage data to generate reports for various stakeholders in your organization.

TAKE ACTION to optimizing floor space, targeting service efficiencies, maximizing equipment ROI, and improving customer satisfaction.

Open network architecture

Ecofit's flexible API infrastructure future proofs your data

Analytic reporting

- equipment rotation
- equipment wait times
- maintenance reports
- vendor accountability
- inventory balancing
- floor space optimization

ecofit portal

- enterprise access to equipment data
- real time critical equipment status
- access to on-line reports
- inventory management
